Forthview Website Review for 2025

The Fife: Forthview Parish Church website went live on 7th May 2024. By January 2025 all five individual church websites were brought together into the Forthview website. Work is still needed to integrate them fully. With the five websites combining into one, the usage increased and it reached its peak in the first half of the year, since then the usage has declined slightly. In 2025 there have been 35,000 views and 12,000 active users

The most popular pages by page views in 2025 are shown in the graph below.

In 2025 the Parish Profile page was removed and four St Fillan's pages added.

News/Posts have mainly been of Forthview and St Fillan's The posts about the three ministers were very popular, they have since been deleted.

The plan had been for one person from each church to contribute to the website, this has not worked, only one person has been responsible for the majority of the content.

During 2025 the website has had users from 76 countries, including 89% of the engagement from the UK and 4% from the USA, followed by China, Germany & Ireland.

59% of users access the website from their desktop, 37% by mobile and 4% by tablet.

Feedback and comments are most welcome.
